

DIAGNOSTIC SUMMARY:**RIGHT HIP, EXCISION:**

- COMPOUND NAEVUS WITH HIGH GRADE DYSPLASIA, CLOSELY APPROACHING AN EDGE MARGIN (0.5mm peripheral clearance).

Reported by Dr Sarah Wallace (Enquiries (07) 3377 8491 sarah_wallace@snp.com.au) 02/08/2022

Clinical Notes: Histopathology. Right hip - ?DN ?mm changing naevus - ex bx.

Macroscopic:

Labelled '**Rt hip**'. A 15 x 7 x 7mm skin ellipse with a tan area 5 x 5mm. 1A 2TS.

Microscopic:

Sections show a compound naevus with moderate to severe cytoarchitectural atypia (WHO Classification: High grade dysplasia). There is no confluence or pagetoid spread to indicate malignancy. The lesion closely approaches an edge margin with 0.5mm peripheral clearance.
