

CLINICAL NOTES

Shave bx - both ?D/N, exclude MM

MACROSCOPIC EXAMINATION

1. Labelled right shoulder: A shave of skin measuring 7 x 5 x 1mm bearing a mid tan macule measuring 4 x 3mm. Bisected and blocked in toto 1A.
2. Labelled right thigh (request form states right medial thigh): A shave of skin measuring 5 x 4 x 1mm bearing a mid tan macule measuring 2 x 2mm. Bisected and blocked in toto 2A.

MICROSCOPIC EXAMINATION

1. Labelled right shoulder: Sections show a benign lentiginous COMPOUND NAEVUS of superficial congenital type. The dermal component extends focally to the central deep edge. The peripheral edges appear clear in the plane of section (shave specimen).
2. Labelled right thigh (request form states right medial thigh): This shave specimen confirms a small MELANOMA IN-SITU (Level 1) with a mixed lentiginous and superficial spreading growth pattern. No dermal invasion or changes of regression are seen. The longitudinal peripheral edges of the shave appear to be clear by approximately 1mm in the plane of section.

SUMMARY

1. SHAVE RIGHT SHOULDER - COMPOUND NAEVUS EXTENDING FOCALLY TO DEEP EDGE.
2. SHAVE RIGHT MEDIAL THIGH - MELANOMA IN-SITU, CLARK LEVEL 1, PATHOLOGIC STAGE PTIS (AJCC 8). PERIPHERAL CLEARANCE APPROXIMATELY 1MM IN PLANE OF SECTION.
